

Vision for the Library

The Library will be a welcoming place for all members of the community

Library users will receive excellent customer service

Library users will have access to the recreational materials they want within a reasonable amount of time

We will reflect our community's needs and interests in everything we do

Library users will be enriched, entertained and enlightened by the programs we offer

Library users will find the accurate and up to date information they need, when they need it

Every visit to the Library will be a positive experience for our residents

We will encourage literacy and the development of reading skills in young children

We will support formal education through 12th grade

We will encourage residents to become life long learners through the services, programs and collections available

We will provide the services that our residents want and need to make their lives better

We will make the Library easy and convenient to use

We will reach out to the community by providing programs and services within the community

We will strive for continuous improvement and new ways to serve the public

We will investigate new technology to determine if it is appropriate for the library

We will keep our equipment and software current

We will provide access to library materials and information beyond the Library facility using the latest technology

We will effectively market our programs, services and collections so residents will be aware of the many things we provide

Not for the public statement , but still a part of what we need to do:

We want to provide the best services, programs and collections we can provide within the limitations of our staffing, budget and facility

We want to continue to increase circulation as a measure of our continuing success in meeting the needs of residents

We want to increase the number of residents that have library cards as a measure of our continuing success

We want to operate the library efficiently and effectively to assure that we are getting the most we can from our staff and our budget
