

How to...

Use the EPSON V550 Scanner

- 1) To scan photos, face them down picture side against the glass and line them up from the top right corner with the arrow

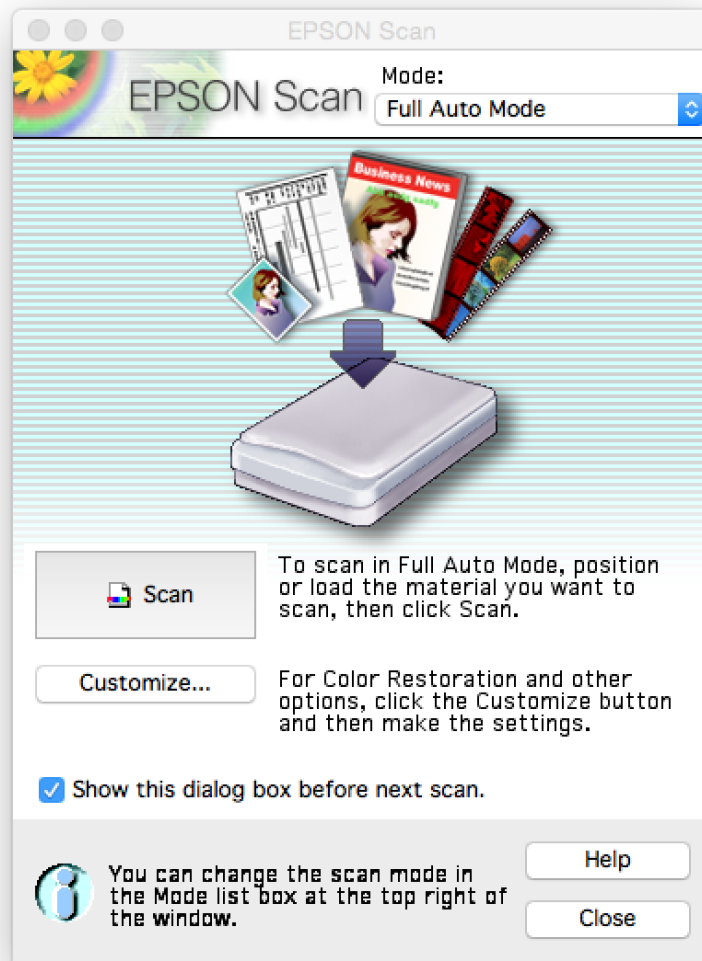

How to...

2) Click on the EPSON application from the iMac Dock:

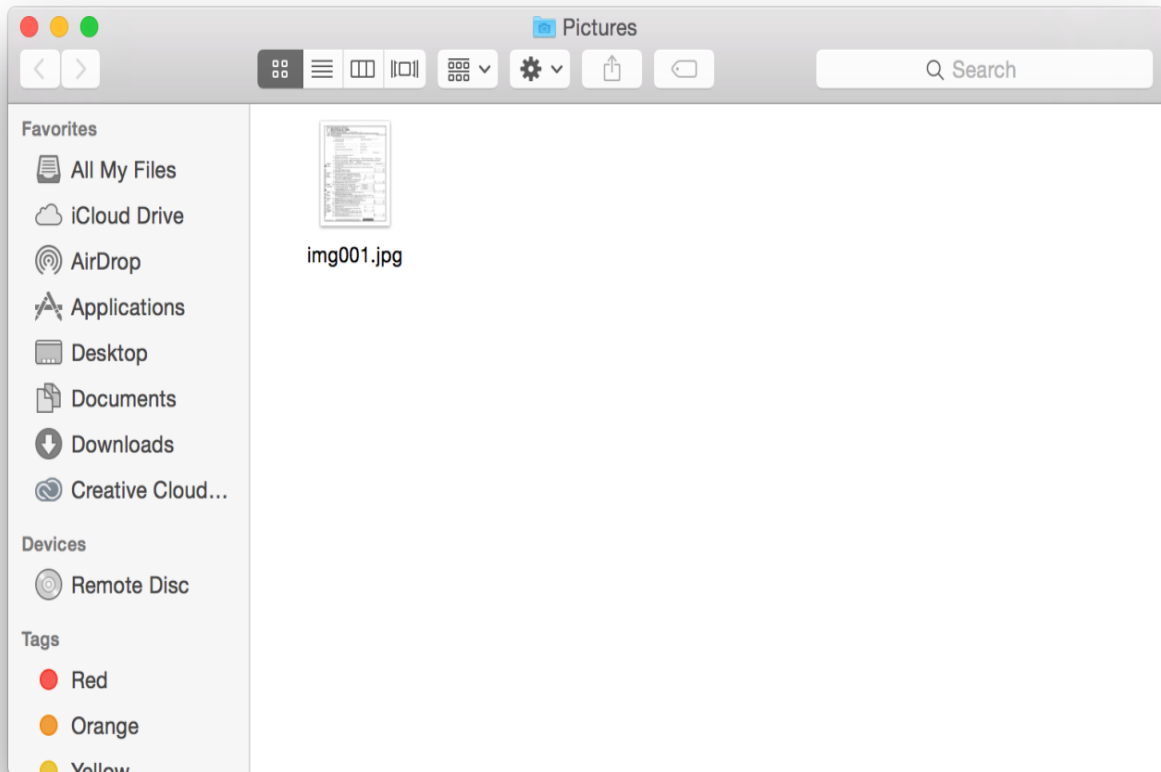

You should see this window:

How to...

3) Click on Scan and after the item is scanned a Pictures folder will open up with the scanned image.

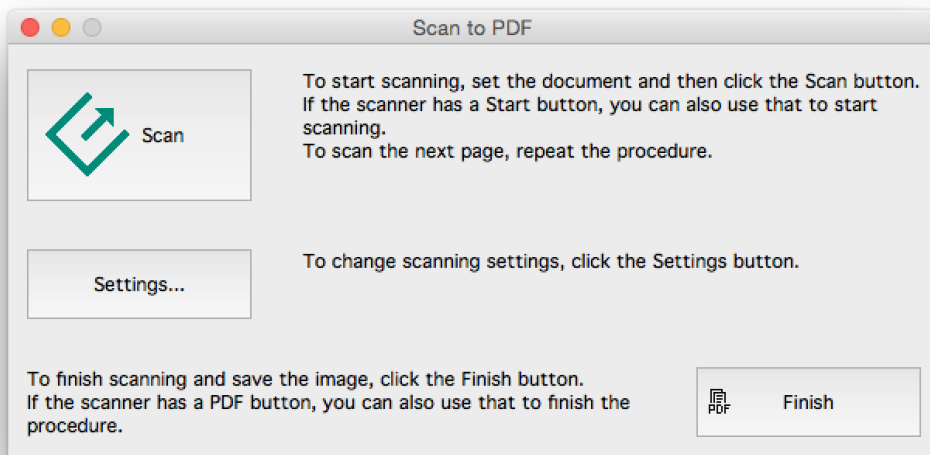

How to...

4) To scan PDFs, press the PDF button on the scanner.

You should see this window open:

How to...

5) Click Scan to scan the document.

Note: If you have more than one document, take the first document out and put the next one in the scanner and click Scan again. Keep repeating this process to scan multiple documents into one PDF file.

Once all documents are scanned, click on Finish and a Pictures folder will open with one PDF file that includes everything you have scanned.
