

How to...

Use Teac LP-R550USB to create mp3.

1. Connect USB cable from Teac to USB hub.
2. Turn on Teac LP-R550USB.
3. Press **LP/Cassette/AUX** button to select source.
4. Open **Garage Band** on the iMac.
5. Select **Empty Project** from opening menu.
6. Select **Microphone** option from next menu.
 - a. On the same screen, you will see **Input 1** selected towards the bottom of the box. Below it says: ***My instrument is connected with: Microphone ►***
 - b. Click on the small arrow to open a menu in the upper left-hand corner.
 - c. Select **System Setting** under **Input Device** and select **Codec USB**.
7. Select **Create** from the first Microphone option menu.
8. You are ready to record from the Teac machine.
9. Press **Play** button on Teac machine or put stylus on record.
10. Simultaneously select **Record** button on Garage Band screen.

How to...

11. When recording is done and you save the file, it will be saved as a .BAND file.
12. If you are done, you can export the file as an mp3:
 - a. Select **Share** from the Garage Band menu bar.
 - b. Select **Export to Disk**.
 - c. Name the file and specify the location to save to.
 - d. Select **mp3** as the file type.
